

## Description

"Banner (ads) upload Pro" was made to easy upload banners - ads in your Prestashop. You can insert banner in: left column, right column, header, footer, footer circle line, home page, with products, categories or create extra floating blocks.

Extra blocks floating in yours page, just set x and y block position. When users scroll down page - banner still be in this windows position. So visitors will always see your ads.

Footer circle line - formed from image banner slider repeated in page width.

Allowed banner type: image (\*.jpg, \*.jpeg, \*.png, \*.gif, \*.bmp) and flash (\*.swf) or custom HTML/JavaScript/CSS code, for example Google AdSense code. When you insert banner you can change banner position – just drag and drop, display time and quantity. Gathering statistics as far as advertising is shown in. You can show different banner with different languages. You can determine which users type will see ads: only register, only unregistered or all users.

This module collects clicks and views statistics, so you can analyze which user click on banner, where and how many times. If you wish, you can add banner like pop-up, this function works like modal, so browser not block this banner. If you want to display the banner in not all shop pages, you can specify the desired page addresses or only a first part address

## Install

**! Important:** If you have old “Upload banner” module, please before install this module uninstall and delete old module.

Open themes/your themes/ **product-list.tpl** file and afer (~27 line):

```
{if isset($products)}
```

```
<!-- Products list -->
```

Add this lines:

```
<!-- BModules banner upload -->
```

```
{if !empty($banner_category)}
```

```
<div style="clear: both;">
```

```
{include file="$tpl_dir../modules/banner_upload/horizontal_banner.tpl" banner=$banner_category}
```

```
</div>
```

```
{/if}
```

```
<!-- END BModules banner upload -->
```
